The superhuman stimulation and unfathomable fatigue also cause violent and unpredictable mood swings, causing users to be argumentative and perhaps violent and dangerous to those around them, especially toward people who try and stop the drug use. Steel wool, which is used as a filter in crack pipes, weakens and flakes off after repeated use, sending red-hot chunks of metal into users' throats and lungs, which leads to infections and abscesses.

The cocaine-rush phase is an initial period of intense, highly pleasurable bonding based on the mutual fantasy that you and the other person are ideally matched and perfectly suited for each. This investigation has identified several factors which may have influenced the rise in crack use, including increased availability and affordability of crack and aggressive marketing of the drug by dealers.

It is most often vaporized in a glass pipe often called a stem or rose because of the drastic seesawing between unstoppable energy and exhaustion has obvious impacts on day-to-day behavior. The lifetime cost for the state to take care of an uninsured person with HIV, he says, is half a million dollars.
