Advances in Communication Systems and Electrical Engineering. M; Knudsen, O.

ImmunologyofPregnancyMor,GilWhitetrafficlight:nodistance-to-target Employees in larger management areas who perform dispatching or management tasks are included as well as employees with activities that require comprehensive business or technical expertise. One main reason for this gap is that women are

still very rarely represented in certain professions, sectors and on the upper end of the job career ladder.

Since these values are not known, no prediction was made by the authors. Article

near-term target was chosen because here a linear projection is regarded as feasible since it can be assumed that the framework conditions influencing the energy system will remain relatively constant within this short time period and that effects of measures previously implemented will support the trend until
