Police say Norwegian business magnate's wife most likely killed. Most Read in News.

A more detailed examination of my brain showed that my dizzy spell had, in fact, been caused by a blockage in the arteries. With severe blockages, doctors may perform surgery called a heart bypass to make sure the blood can get around the obstructed artery. Most people with PAD do not need surgery.

I have recently read two other walking books that in part cover the route under discussion. The first is a mixture of fat, calcium, cholesterol and waste from the cells in the body. It produces nitric oxide, which helps keep the artery open and healthy.
