The working logic of the software is based on opening as many image files as desired. The challenge with such data lies in systematic and scientific extraction of relevant information. The project developer, Wayne Rasband, retired from the Research Services Branch of the National Institute of Mental Health inbut continues to develop the software. CloudComputing.Someusefulplugins. I really appreciate. Creating master flat when you have large number of subs This is straight forward average method of creating flats no sigma reject - that will be covered in subsequent tips. I've discovered that there is checkerboard pattern in my flats with ASI, so above methods are not quite precise. RecommendedPosts.Hyperstacksareusefulwhenthereismorethanoneimagep you do this - new image will be created - save that image as your master flat, and close all I appears that there is a spectroscopic plug in for ImageJ, haven't tried it but may be
